

## OKTOPUS® GGA-E-B 5000 oVH

Load lifting attachment for lifting and positioning of construction elements

### **Application**

The counterweight balancer GGA-B 5000 is a load lifting attachment. It serves for lifting and positioning construction elements with integrated crane eye or for lifting and positioning construction elements in difficult to access areas (e.g. below eaves). Electrically driven counterweights allow balancing the load.

### **Description**

- electrically driven counterweights operated with cable remote control for balancing loads up to 5,000 kg
- battery-powered energy supply with high capacity
- built-in gauge for monitoring energy supply

## WORKING LOAD LIMIT OF THE COUNTERWEIGHT BALANCER

Overhang	Working Load Limit of the counterweight balancer
1,50 m	5,000 kg
1,75 m	3,900 kg
2,00 m	3,200 kg
2,25 m	2,650 kg
2,50 m	2,200 kg
2,75 m	1,850 kg
3,00 m	1,550 kg

## APPLICATION DATA

Counterweights	34 pieces removable (1 counterweight = 50 kg)
Operation	cable remote control, radio remote control optional
Power supply	24 V battery system
Weight	approx. 900 kg (without counterweights) approx. 2.600 kg (with 34 pieces counterweights)
